Live, Breathe, Grow with Haihong.

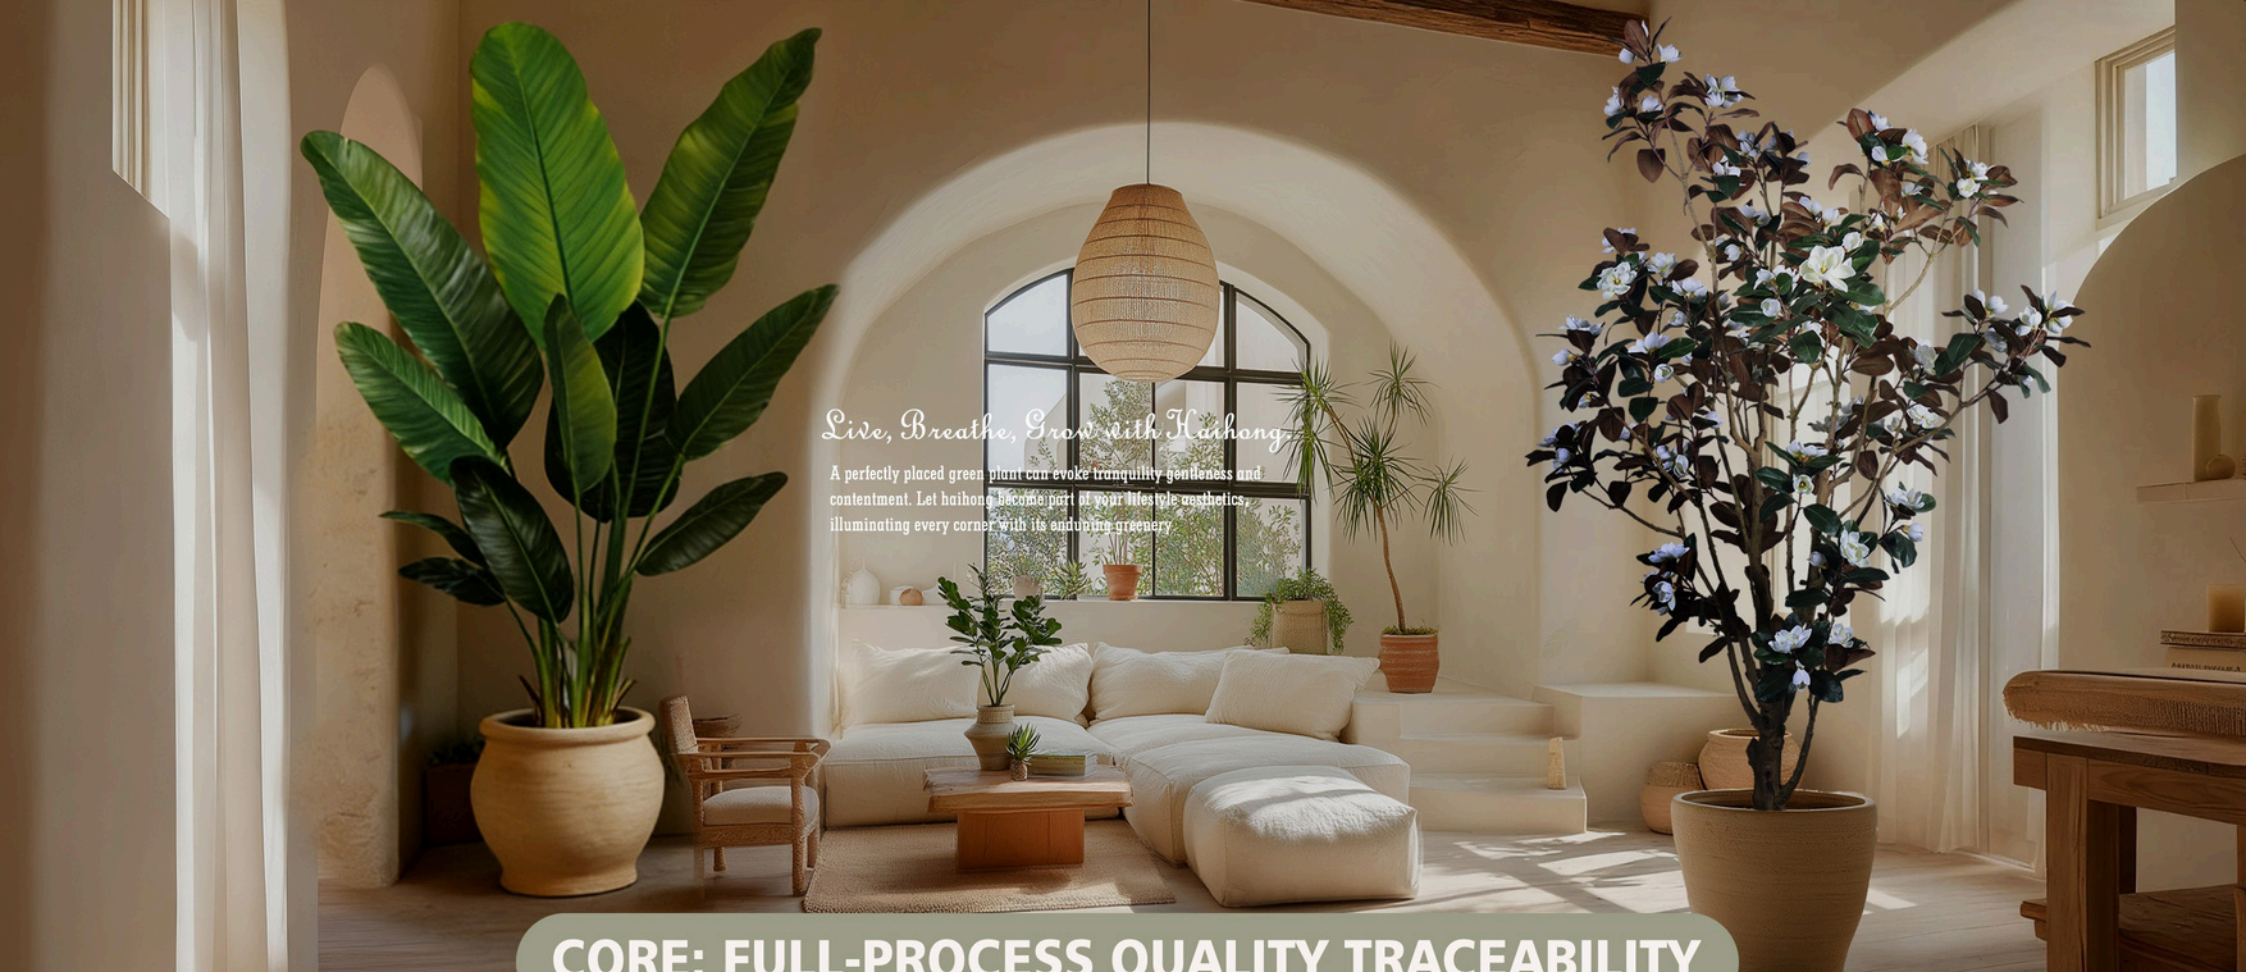

A perfectly placed green plant can evoke tranquility, gentleness and contentment. Let haihong become part of your lifestyle aesthetics, illuminating every corner with its enduring greenery.

CORE: FULL-PROCESS QUALITY TRACEABILITY

- **Product R&D** (Guided by European Aesthetics and Application Scenarios)
- **Mould Manufacturing** (Precision Craftsmanship Lays a Solid Foundation for Quality)
- **Silk Screen Printing** (Restore Natural Colors & Adapt to European Climate)
- **Shaping** (Create Natural Shapes with Enhanced Stability)
- **Injection Moulding** (Eco-friendly Substrates for Safety & Durability)
- **Assembly** (Modular Design for Convenience & High Efficiency)
- **Quality Inspection & Quality Management** (Full-process Quality Control to Guarantee Delivery Quality Stability)

BEYOND IMITATION: THE DETAIL IS REAL.

QUALITY INSPECTION & QUALITY MANAGEMENT

Full-process Quality Control to Guarantee Delivery Quality

This is how we control quality: at R&D stage, there is third-party testing; at mould stage, random sampling inspection of dimensional accuracy; at silk screen printing stage, there are 50 friction tests with no color fading by friction tester; at shaping stage, each leaf must pass the 10kg tensile test; at injection moulding stage, we have samples sent for ROHS compliance testing per batch; at finished product stage, 100% full inspection + random re-inspection are adopted to ensure quality.

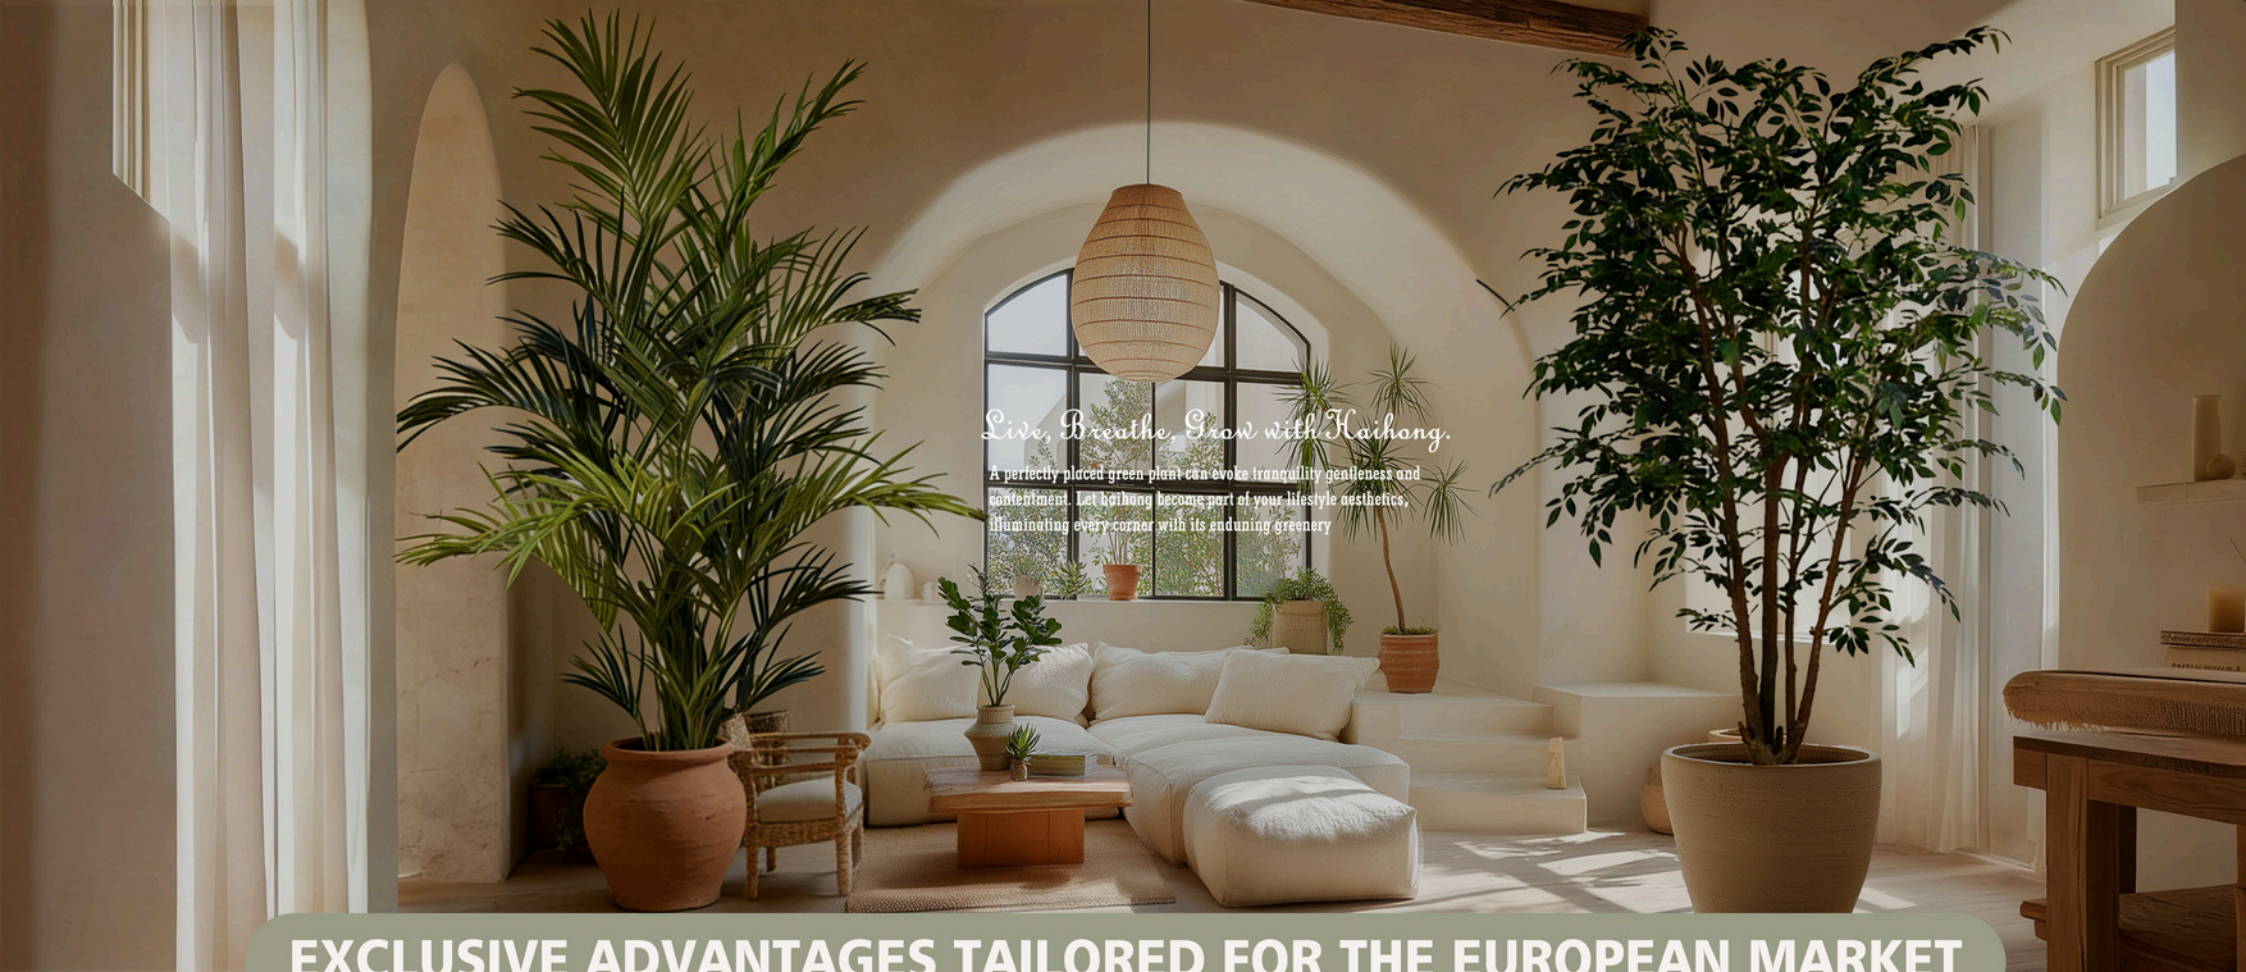

Certificate Display

ASTM E84-22 class (American standard) 美标

EN 13501-1:2018 (European standard) 欧标
